

Company Profile

1 INTRODUCTION

Kansas Softwares Solutions was set by a group of techno-commercial professionals who are all first generation entrepreneurs. The group's vision is to build a world-class organization providing end-to-end software services in an onsite/offshore framework.

With our zest for technology propelling us, we believe, we could materialize our Vision of energizing the way businesses operate. Our development hubs concentrate on core technology expertise and bring out end-to-end solutions for Web Development and Web Hosting, Healthcare services, Business Applications, Enterprise Management, e-Applications and Workflow Automation.

With successful footprints in IT sands already, we want to make our impression in the global business solutions arena with an undiluted focus on quality and elegance.

2 THE TEAM

Kansas Softwares Solutions has professionals with diverse background in technical and functional areas.

The company, with its highly qualified result oriented team of software Engineers & Computer professionals with specialization in Visual Basic, .NET, ASP, PHP/MYSQL, XML, XAML, Java and a host of web and graphical tools, can provide innovative and cost-effective solutions to meet any challenge.

Technology tide never stands still and we at **Kansas Softwares Solutions** equip ourselves with cutting-edge Technology tools and solutions to stay ahead in the IT highway. We embrace both Microsoft Windows Platforms and Open system standards with all our developers qualified in the respective domain. Constant review sessions with our team members are conducted, individually or en masse as situation demands. Continuous Education Program (CEP) keeps our team well versed, professionally and technically qualified all the day long.

Our Offshore Development Center – ODC's house state-of-the-art technological infrastructure, which includes:

- ✚ Branded workstations with latest configuration for all users
- ✚ Highly secured hardware based CISCO PIX Firewall
- ✚ Automated backup service integrated with all servers
- ✚ State-of-the-art EPABX system and VOIP enabled services

- ✦ Uninterrupted power supply for seamless operation
- ✦ Dedicated leased data circuit for Internet usage with fail-over ISDN link
- ✦ High-end servers from Compaq, and HP
- ✦ Speeded switched network of 30+ nodes

At Coimbatore, we utilize an offshore software development center (ODC) spanning over 2500 Sq. ft. capable of housing 30+ software consultants. The ODC uses a multi-dimensional approach, planned to support growth and technology advancement, thus ensuring that the solutions we architect for our clients are built in a most productive and effective manner. We are situated in the commercial hub of the City. High-speed data communication links provide connectivity to clients worldwide. The ODC is a spacious center and the sophisticated infrastructure is complete with an array of advanced workstations, cutting edge computing and network systems, power packed online servers, smart communications systems, video learning facilities. The team as of now has got 40,000 hrs of hands of experience in handling ASP. Net projects along with over 60,000 hrs of experience in VB. NET and around 15,000 hrs of experience in C#.

3 SCOPE OF OUR SERVICES

When we talk about Business solutions, it is important to understand the business our clients are into, which comprises of A - Z functions. This propels us to provide End-to-End solutions. The picture is complete when all the operations are effectively integrated into one single platform and we exactly excel in that. Whether you want to introduce yourself to the world through a website or want a complex enterprise solution to compliment your operations, we are right at your reach.

7 INFRASTRUCTURE

We at **Kansas Softwares Solutions** are proud to have an infrastructure that is advanced and provides the right invigorating environment to ensure the best products and services to our esteemed customers. Our facility is exemplary in all parameters in keeping with our stature in the marketplace. **Kansas Softwares Solutions** has the state-of-the-art technology with constant up gradation, offers superb facilities for the creative team to bring out unique winning products.

Our team comprises of the cream of well qualified and experienced people whose futuristic and powerful concepts blend into our designing, presentation and development skills. We have highly skilled experts in our creative team specialist project experts to make every project a resounding success for the participating company and for us. We use the latest software technology and the best professionals skilled in each and every aspect of the processes. Power back up facility for the computers and high speed broadband internet connection and the latest equipment and software ensure our prompt and efficient project completion under any circumstances.

Our well provided and comfortable rooms for resting during breaks for our teams are our way of taking care of our team which we consider as our best asset. Our quality assurance experts ensure the highest standards in every stage from start to completion of all projects. Our concern for providing the most conducive and peaceful atmosphere for our teams to co-ordinate is evident from our well equipped environment.

The City: Our office is situated in the heart of Coimbatore. Coimbatore is a city in the foothills of the Blue Mountains (Nilgiris), thus enjoying a pleasant climate, the temperature averaging a pleasant 32 degrees Celsius throughout the year. This city is called the Manchester of South India for its mark for comprising of textile & engineering industries in the city. Due to many colleges and universities in the city, there is a ready availability of educated, English-speaking, young population to tap into training and recruitment in this field. With availability of good infrastructure, electricity, roads, airport easily accessible from Chennai and Mumbai, broadband internet connectivity with absolutely 0.1% downtime, the immunity of this city to natural calamities such as earthquakes, floods, cyclones, storms, etc.

The Place: We have a 2500 sq. ft. office space with a three-phase electricity connection sufficient to support our operations. To handle any power shortages, we have installed a 15 KVA UPS in our premises, which have a backup of 10 hours. We can expand ourselves upto 500 seater capacity under one roof during the need arises.

The Connectivity: We have ADSL Internet connectivity with a bandwidth of 1Mbps. We have a backup of router Internet broadband connection with a bandwidth of 1Mbps sufficient for our operations and can be upgraded in short notice.

8 SERVICE AND SUPPORT

We believe that with a stable and trouble-free product, we can provide prompt and efficient after-sales support to our clients. We have always striven to build a product that is user-friendly, stable and robust thereby minimizing the necessity of after-sales support. We offer unlimited online and tele-support. We also provide online training sessions for new customers. We do have qualified engineers for onsite support.

We remain online throughout our workday for contact through MSN Messenger, Yahoo Messenger, Google Talk and Skype.
